

# Valley® VRI Optimization

RELIABLE | DURABLE | PRECISE | ADVANCED | RESPONSIVE

**VALLEY** 

The Leader in Precision Irrigation

# Variable Rate Irrigation

Valley VRI (Variable Rate Irrigation) allows you to customize your water application based on topography information, soil data maps, yield data, and other user-defined information. All available field data is pulled together and used to develop a VRI prescription.

## More About the Prescription

The Valley VRI prescription software allows you to customize your prescriptions based on your field's requirements.

- The software makes it easy to make adjustments to your prescription throughout the growing season
- The prescription is uploaded to your computerized control panel or Valley TrackNET® product

## VRI QuickStart (QS) Prescription

The VRI QuickStart Prescription program is for those of you who want to start using VRI Speed Control immediately.

- With the NEW QuickStart Prescription, a team of Valley agronomists will write a prescription based on your field's information
- This prescription can either be pre-installed into your new control panel before it leaves the factory, or it can be wirelessly uploaded to your panel through BaseStation or your TrackNET product
- Want to use a QuickStart Prescription on an existing machine, but don't have TrackNET or BaseStation? No problem! You can also upload the prescription at the pivot point.

## Here's the Breakdown of How it Works:

1. Your local Valley dealer helps you determine the ideal water application depths across your irrigated land
2. Based on this information, our certified Valley VRI Agronomists develop the prescription and upload it for you.
3. Start using VRI Speed Control right away!

## Want to Take VRI to the Next Level?

With VRI Optimization, you can!

Variable Rate Irrigation Optimization gives you access to powerful agronomic tools that create prescriptions to precisely match your application depths to soil type, topography data, in-season imagery, and historical yields. You will select a data management service company that will help you optimize VRI Zone Control and Speed Control for your operation.

See your local authorized Valley dealer for complete details.
